Title: Pizza Point of Sale

Description: This project models a pizza restaurant, which gets customer order and delivers both take-away and dine-in. It includes chefs and master chefs who cook the pizza and delivery agents to deliver take-away orders. An admin is present, who can change menu according to availability.

Actors: Customer, Master chef, Chefs, Delivery agents, Admin

Functionality:
1. Take the choice of the customer.
2. Notify the order to the chef.
3. Chef cooks pizza.
4. Notify user if Pizza is ready.
5. Admins can sign in and change the menu.
6. Toppings are added according to user preference.
7. Master chef cooks Pizza of the day and special orders.
8. Enable home delivery through delivery agent if requested.

Stretch Functionality:
1. Track pizza delivery.
